Windows Forms Programming - Exam Paper
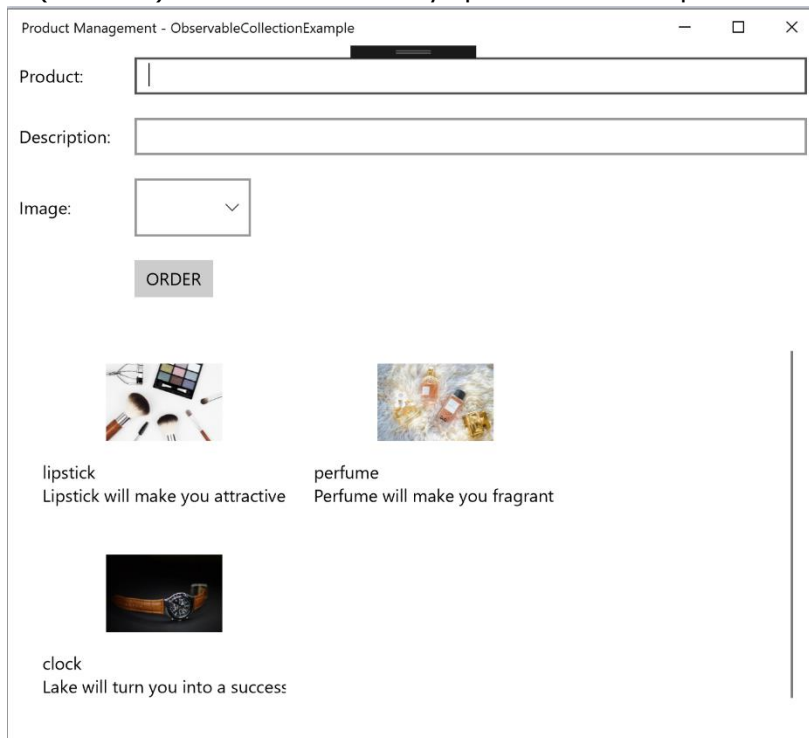

Duration: 60 minutes | Marks: 10

Product Management Project

You are required to create a form to import new products for a fashion store. Form information: Product, Description, Image. Product is the product name, Description is the description of the product, Image is the product image.

Note: Product Picture is a combo box that loads product images in the Asset folder and the user selects only.

You need to do the following: **(total 15 marks)**

1. (**3 marks)** Create a form add as the picture includes: Product, Description, Image

2. (**2 marks**) ComboBox automatically loads images in the Asset folder

3. (**3 marks**) Click on the ORDER button to add new product list into Model

4. (**5 marks**) GridView used to display the product from Model

5. (**2 marks**) GridView automatically updates when new products are added

- The students won't get any marks if the program not running or complying error.
- The students won't get partial marks for uncompleted functions.
